

March 15th, 2021

Dear TRU faculty,

This note is to confirm that Tia Davison has written a sustainability-related article about how tourists can travel the [Cariboo Chilcotin Coast](#) tourism region in an Electric Vehicle (EV). The article will be posted to the DMOs (destination marketing organization) website and shared across their social media pages within the next couple of months. An interactive map will also be built into the site to make it easier for tourists to learn about EVs and plan their journeys.

Based on the criteria Tia provided me with, I believe that this article would fulfill the Giveback Piece portion of her Leadership in Environmental Sustainability certificate.

Sincerely,
